

This quick start guide describes how to install and use the Hardened Ethernet Extender over copper wires. This is the Hardened Ethernet Extender of choice for harsh environments constrained by space.

Installation

ED3538T (Transmitter): This is a PoL (Power over Link) transmitter. Data and power can be delivered at the same time through one pair copper wire to turn on and communicate with ED3538R (Receiver) via RJ-11 phone jack or 2-pin Terminal Block interface of the ED3538T.

ED3538R (Receiver): This is a PoL (Power over Link) Receiver. ED3538R (Receiver) can be powered either by ED3538T (Transmitter) through one pair copper wire or power supply. The Ethernet port supports IEEE802.3at PoE/PSE for fulfilling PoE/PD application.

<Warning>

- Removes the device power before installation.
- Removes the device power before any I/O and DIP switch configuration.
- Do not connect ED3538T and Receiver to the same power source. Devices may be damaged due to power loop back through the PoL linked via copper wire.

PoL (Power over Link) Mode Enable Installation

- Ensures all power sources are disconnected from ED3538T and ED3538R.
- Ensures ED3538T PoL (Power over Link) DIP switch is in **On** position (Up position).
- Sets ED3538T Type DIP switch to Perf (Performance, Up position) to acquire better Line Speed (but poor noise immunity). Or sets Type DIP switch of ED3538T to Std (Standard, Down position) to acquire standard Line Speed (but better noise immunity).
- Checks if ED3538R Mode is set to Rmt on DIP switch (Remote, Up position).
- Connects one end of the one pair copper wire to RJ-11 phone jack or 2-pin Terminal Block interface of the ED3538T and the other end to RJ-11 phone jack or 2-pin Terminal Block interface of the ED3538R.
- Connects power source to ED3538T.
- Data and power can be delivered from ED3538T, and at the same time through one pair copper wire to turn on and communicate with ED3538R.

<Note> The equipment is designed for building installation and not intended to be connected to exposed (outside plant) networks including campus environment or equivalent.

PoL (Power over Link) Mode Disable Installation

For longer distance (e.g. over 1.4km) extension application, ED3538R may not be able to receive power from ED3538T. A separate power may be applied on ED3538R.

- Ensures all power sources are disconnected from ED3538T and ED3538R.
- Ensures ED3538T PoL (Power over Link) DIP switch is in **Off** position (Down position).
- Sets ED3538T Type DIP switch to Perf (Performance, Up position) to acquire better Line Speed (but poor noise immunity). Or sets Type DIP switch of ED3538T to Std (Standard, Down position) to acquire standard Line Speed

(but better noise immunity).

- Connects power source to ED3538T.
- Checks if ED3538R Mode is set to Rmt on DIP switch (Remote, Up position).
- Connects power source to ED3538R.
- Connects one end of the one pair copper wire to RJ-11 phone jack or 2-pin Terminal Block interface of the ED3538T and the other end to RJ-11 phone jack or 2-pin Terminal Block interface of the ED3538R.
- Data can be transmitted between ED3538T and ED3538R via copper wire.

Physical Description

The Port Status LEDs and Power Inputs

ED3538T

ED3538R

- DC Terminal Block Power Inputs: 2.5A @ 48VDC (Peak current 3.26A). There are two pairs of power inputs can be used to power up this Ethernet Extender. Redundant power supplies function is supported. You only need to have one power input connected to run the Ethernet Extender.
- DC JACK Power input: 2.5A @ 48VDC (Peak current 3.26A).

Power supply suggestion	30 watts application
SDR-120-48 / DR-120-48 (120W 48VDC)	For one pair
SDR-240-48 (240W 48VDC)	For three pairs
SDR-480-48 (480W 48VDC)	For seven pairs

Power Input Assignment		
Power1	48VDC	DC Jack
Power2	+	T: 46-57VDC R: 46-57VDC
	-	Power Ground
Power3	+	T: 46-57VDC R: 46-57VDC
	-	Power Ground

DIP Switch	Down	Up
ED3538T		
PoL	Disable Power over Link	Enable Power over Link
Type	Std (Standard) Standard line speed Better noise immunity	Perf (Performance) Better line speed Poor noise immunity
ED3538R		
Mode	Loc (Local), Set ED3538R to Local Mode	Rmt (Remote), Set ED3538R to Remote Mode
Type	Std (Standard) Standard line speed Better noise immunity	Perf (Performance) Better line speed Poor noise immunity

10/100Base-TX and Ethernet Extender Connectors

10/100Base-TX Connection

The following lists the pinouts of 10/100Base-TX RJ-45 port.

Pin	Regular Port	PoE Port
1	Output Transmit Data +	Output Transmit Data +
2	Output Transmit Data -	Output Transmit Data -
3	Input Receive Data +	Input Receive Data +
4		Positive (VCC+)
5		Positive (VCC+)
6	Input Receive Data -	Input Receive Data -
7		Negative (VCC-)
8		Negative (VCC-)

LEDs	State	Indication	
Power 1/2/3	Steady	Power received	
	Off	Power off	
PoL	Steady	Power Ethernet extension interface function is enabled	
	Off	No power is transmitted over Ethernet extension interface	
PoE	Steady	Powered device (PD) is connected	
	Off	Powered device (PD) is disconnected	
Link	Steady	A valid Extender connection established	
	Fast Flashing	Data transmission or receiving	
	Slow Flashing	Extender port under negotiation mode	
	Off	Extender interface connection is not established	
Line Speed	Steady	Displays the link speed in Mbps	
PSE Output	Steady	PoE power can be transmitted for PD	
	All off	No PoE power can be transmitted for PD	
	Green	Steady	A valid Ethernet connection established
		Flashing	Data transmission or receiving
		Off	Non-Ethernet connection is established
	Yellow	Steady	Link speed at 100Mbps
		Off	Link speed at 10Mbps

Ethernet Extender Connection

The RJ-11 and Terminal Block port pinouts
Pin 3: Tip, Pin 4: Ring.

Use a telephone line to connect two RJ-11 or Terminal Block ports between two Hardened Ethernet Extenders.

Functional Description

- Meets EN61000-6-2 & EN61000-6-4 EMC Generic Standard Immunity for industrial environment.
- Ethernet port: Supports IEEE802.3/802.3u/802.3x. Auto-negotiation: 10/100Mbps, full/half-duplex; Auto MDI/MDIX.
- Auto data rate negotiation for Ethernet extension interface.
- Six speeds with speed indicator LEDs on front panel of unit, up to 100Mbps @ about 300meters (984ft.), down to 1Mbps @ about 2,200meters (7,218ft.).
- Supports Power over Ethernet application up to 1,200meters (3,937ft.) for Max. 5 watts power consumed PoE powered devices.
- Power consumption:
 - Enable** Power over Link (PoL) function: Max. 65Watts
 - Disable** Power over Link (PoL) function: ED3538T: Max. 5W
ED3538R: Max. 35W with PoE output
Max. 5W without PoE output.
- Power Supply: Redundant T: 46-57V, R: 46-57V DC Terminal Block power inputs and 48VDC Latched DC JACK interface.
- Operating temperature range @ -40°C to 75°C (-40°F to 167°F). Tested for functional operation @ -40°C to 85°C (-40°F to 185°F).
- Supports Din-Rail or Panel Mounting installation.

Power over Link (PoL) Enabled		
Distance	Data Rate	ED3538R PoE Output
300M	100Mbps	30.0W
400M	90Mbps	15.4W
600M	60Mbps	14.0W
800M	45Mbps	9.5W
1000M	35Mbps	7.0W
1200M	20Mbps	5.0W

Power over Link (PoL) Disabled Power Supply Applied on ED3538R		
Distance	Data Rate	ED3538R PoE Output
1400M	15Mbps	30.0W
1600M	10Mbps	30.0W
1800M	3Mbps	30.0W
Up to 2200M	1Mbps	30.0W

<Note> The Reference Performance is tested on 24AWG Telephone wire (0.5mm diameter, 1-pair wire, Cable impedance: 100ohm).
