Product Highlights

Easy

- Mount units to a pole or wall using included mount kit
- Signal strength LED's for easy alignment
- Just power and align using supplied PoE injectors and power supplies
- No technical expertise needed

Hardened-Grade for Outdoor & Harsh Environments

- Fanless and ruggedized outdoor IP67 enclosure (Rainproof)
- Wide operating temperature range (-40° to 167°F)
- Connections up to 2 miles away

Highly Secure

- Encrypted & Authenticated Wireless Connection (WPA2)
- Every kit has unique SSID and security settings
- Management Frame Protection (MFP) enabled
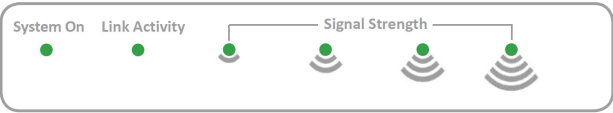

Overview

EtherWAN's EasyLink MP is a pre-configured Multipoint Bridge kit which allows for connecting a set of remote locations wirelessly up to 2 miles away. EasyLink MP's simple setup allows you to connect locations by mounting the hardware, powering them on, and aligning the units using the built-in alignment LEDs. Each kit contains one central bridge unit plus two/four/six auxiliary units that connect automatically using a highly secure, unique, and hidden SSID and randomly generated passphrase to keep your valuable equipment secure right out of the box. No need for complicated setup software, just plug it in, aim it and you are connected.

Note:
The EasyLink MP is a cost-effective multi-point Wireless Bridge solution. For successful deployment a couple of factors should be taken into consideration.

1. If one of more ends of the connection do not have access to a temperature controlled area within 350ft. for powering the unit, it is advised to purchase the optional hardened power supply.

2. When mounted outdoors it is required to use UV rated shielded twisted pair CAT 6 cabling. This helps protect against surges due to electrical storms. Be sure the network side of the shielded cable is grounded either through the swtich or recepticle. Optional grounded
