

EW75200-1308

Hardened IP67 Outdoor Wireless Access Point/Bridge

Overview

The eWAV EW75200-1308 is a hardened IP67 outdoor wireless access point (WAP) providing high speed wireless connectivity for harsh and demanding environments. Comprised of high-power, long-range IEEE 802.11ac MIMO wireless radios with gigabit IEEE 802.3at PoE connectivity, the EW75200-1308 is hardened against extreme temperatures and water ingress. eWAV delivers the power and range (up to 20 miles) to wirelessly connect remote networks or extend existing networks in an efficient and cost-effective way. The EW75200-1308 supports two 5GHz 802.11a/n/ac Radios for long-distance Point-to-Point/Point-to-Multi-Point data transmission and local device access such as laptops, wireless IP cameras, or mobile devices. Maximum transmission speeds are up to 867Mbps on each 5GHz radio.
