

Highlights

- + Interoperable between different fiber connector types
- + Available in single-mode and multi-mode cables
- + LC to LC, LC to SC, and LC to ST options for use with EtherWAN SFPs

Overview

EtherWAN's fiber patch cables serve as interconnect between SC/ST connector-based fiber cabling and EtherWAN switches with fiber connectivity through SFP modules using LC connectors. Single mode and multi-mode options are available along with 1- and 2-meter length options for various applications.
