eVue

Network Configuration and Monitoring Tool

Overview

eVue is network management software for EtherWAN's managed devices, designed to simplify network configuration. It provides the ability to discover EtherWAN devices on a network and display an intuitive, visual representation of the network topology. Plus, it allows system administrators to monitor network status, manage and perform bulk configuration deployment, schedule firmware upgrade, and more. eVue gives you up to the minute information on critical network systems with the user-defined event notifications. Faster and easier switch deployment and management means eVue will save you serious time, effort, and money.

EtherWAN — "**When Connectivity is Crucial.**"

Specifications

System Requirements
